Last Call—Make Guesses this Week.

COBRADE:
If you live east of the Rocky Mountains you still have time to make guesses. In fact, you can make the best guesses now, because you have the previous Treasury receipts before you, and a great feature of this week's issue is to detail below. Dollars, treble, or multiply this deal by you if you are able. The prices are worthy of it.

Send $5 and make 4 guesses. You may get for this, next week, a prize of thousands of dollars, and you are sure to get $12 worth of books, or five prize numbers for your own subscription, five years. Or, you can fill the $5 stand in your credit and get books and subscriptions later on.

Or, send $5 and make 4 guesses. This incenses your chances of winning a big prize, and the editors or papers pay for this, which promptly reissue your salary and make big money besides, as explained below.

"Best in the sink of time." Make your guesses. Making guesses is just picking up a fat pocket-book in the middle of the road. It may be stuffed with cashes and notes, or it may contain nothing to pick up and examine it. Neither does it cost anything to make guesses; you get more than full value in books or subscriptions. And the guessing pocket-book, if it contains a prize, is yours, not some other fellow's, who will be advertising for it.

Get Your Bargains and Guesses.

SEND $10.
For full-year subscription to the paper, either new or renewal, for the last issue, the price is 12 months for $10 worth of books now, or a three-year subscription for $5, or a two-year subscription for $3.
